Memorandum to Holders of SNIE 31-81: "Pakistan's Nuclear Weapons  
Program: The Next Three Years"

Concept/Terms of Reference  
(Draft For Review by NFIB Representatives)

Concept

This memorandum will review the key findings of the SNIE, particularly relating to the timing for the capability to produce fissile material and explode a nuclear device. (The SNIE contains the judgment that Pakistan probably will be able to explode a device shortly after fissile material becomes available--probably in late 1982 but more likely in late 1983 or 1984.)
